

A CHANGE FOR THE BETTER

As per the Central Electricity Authority (CEA) Regulations made under Electricity Act, 2003, all consumer meters have to be of static type (Electronic Meters). As of today, about 14 lakh meters have been replaced, which is over 70% of the total meter population of BSES.

For us however, this is also an opportunity to further improve and upgrade the distribution infrastructure close to your home.

OVERHAUL OF THE DISTRIBUTION NETWORK UP TO YOUR DOORSTEP

As we implement the meter change program, we will also overhaul the last mile infrastructure. Changing defective cables, busbars, junction boxes etc., so you can enjoy the benefits of electricity network modernization that BSES has carried out over the last four years.

COMMITTED TO AN EFFORTLESS CONVERSION

We, at BSES are committed to make this transition a smooth exercise and request your kind cooperation in making it a success.

Our teams involved in the program will carry identity cards and satisfy all your queries pertaining to the meter change exercise.

In case of any inconvenience, suggestion or information, please call us at 39999707 (BSES Rajdhani Power Limited Area), or 39999808 (BSES Yamuna Power Limited Area) or write in to ceo@bsesdelhi.com. You can also call the BSES Business Manager of your division.

Together, let's make Delhi shine.
