

Monsoon Safety: Essential Tips to Prevent Electrical Mishaps

Much to everyone's delight, the monsoons are here again! However, with the arrival of the rainy season, comes a unique set of challenges, particularly those related to water-logging and electrical safety. The chances of electricity-related mishaps and incidents increase significantly during this time. Following simple precautions can help you stay safe and ensure an incident-free monsoon.

1. Stay away from all electrical installations such as electricity poles, substations, transformers, and streetlights.

2. Caution children not to play near these installations, even if they are barricaded.

3. Do not touch electrical appliances with wet hands.

4. Keep a tester at home. If a switch or a wall in your house is wet, do not touch it. First, use the tester to check for any electricity leakage. If needed, call your electrician.

5. Install an ELCB/RCCB to help avoid shocks and mishaps.

“A little caution today can prevent a big accident tomorrow.”
