

CORRIGENDUM – 2 FOR NIT NO NIT NO CMC/BR/25-26/FK/PR/KG/1307 for Design, Engineering, Supply, Installation, Testing, Commissioning and Comprehensive Operation & Maintenance (O&M) of Grid-Connected Rooftop Solar PV systems with a cumulative capacity of approximately 2.2 MWp to be installed across 46 BRPL grid stations & buildings.

CORRIGENDUM DATE: 16-12-2025

SL. NO.	DESCRIPTION	PROPOSED CLARIFICATION	RESPONSE
1	Pre-Bid Queries	Kindly clarify whether the solar power evacuation for all sites under this tender is to be done strictly at the LT level, as specified in the technical requirements. We seek this clarification since Annexure II (Pages 75–341) repeatedly mentions the parameter 'Distance from Solar to Transformer'. This parameter generally pertains to HT-side evacuation and does not appear to have any correlation with LT-based grid-connected rooftop systems. Please confirm the intended evacuation voltage level (LT or HT) and explain the purpose of indicating the transformer distance in the site details.	Evacuation Voltage Level is LT.
2	Site Visit		Vendor interested in visiting the site locations shall fill and submit the Attached Temporary Entry form by 17.12.2025 – 12:00 HRS via Email. Kunal.govil@reliancegroupindia.com Mayank.ahlawat@reliancegroupindia.com
