CONGRATULATIONS Dear Consumers...

Hon'ble Chief Minister of Delhi Smt Sheila Dikshit at the SCADA Centre.

Today each and every one of you is serviced by the next generation electricity distribution management system. The ushering in of this technology - incidentally the only of its kind in the country - not only puts you in the company of global cities like Hong Kong, Stockholm, Singapore or London, but also ensures that you get quality, reliable and uninterrupted electricity supply - the last is subject to availability of sufficient power.

The benefits of this unique electricity distribution management system - which you know as SCADA - are immense. It makes the task of routing power to a 'problem area' as easy as

batting an eyelid; it minimizes time taken for fault identification, isolation and restoration; it strengthens the distribution management system; it helps forecast load; it helps minimize technical losses as well as prevent power theft.

SCADA-Supervisory Control And Data Acquisition system - simply put, is the best you could ask for. Located at Balaji Estate in Kalkaji, SCADA was recently inaugurated in an impressive ceremony by Smt. Sheila Dikshit, Chief Minister of Delhi. Others who graced the function included Shri Haroon Yusuf, Delhi Power Minister, Shri Subhash Chopra, Delhi legislator, Shri S R Sethi, Director (Ops) Transco, Shri Arun Kanchan, CEO, BYPL and Shri Lalit Jalan, CEO BRPL.

This state-of-the-art electricity distribution technology, set up at a cost of over Rs 150 crore, will change the face of power distribution in BSES' licensed area and benefit all its 23 lakh customers. Resembling a futuristic space centre with massive screens measuring 5.6 meters x 2.2 meters, SCADA is manned by an intricate web of computer desks - operated by highly trained engineers - on a real time basis. Any abnormality

in the system gets immediately flagged and corrective action taken. Operations of all the 117 Grid Stations in BSES' licensed area would now be remote controlled through SCADA control centre.

BSES has worked with some of the best names in the business including ABB (Sweden), Barco Control System (Belgium), Honeywell Automation, Reliance Infocomm and HECL.

To ensure that BSES' paying customers continue to get uninterrupted power supply even in the wake of unforeseeable disasters and calamities, BSES has also adopted international Disaster Management practices while creating SCADA.

SCADA Control Centre at Kalkaji, Delhi

Experience SCADA Hands On!!

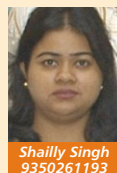

Take pride in SCADA. Avail SCADA DARSHAN offer. Come one... Come all...

BYPL has launched a unique program for all its consumers, particularly for representatives of RWAs, Students and those interested in both electricity and electricity conservation. Titled SCADA DARSHAN, the hour-long program aims at making consumers aware of the company's recent initiatives and to allow them to experience first hand the business and management of electricity in BSES' licensed area.

Those who have already enjoyed and benefited the SCADA experience include representatives

from many South Delhi and East Delhi RWAs. Besides getting an opportunity to get a hands-on experience of SCADA's functioning, the RWA members also got an opportunity to interact with SCADA experts.

Keeping in tune with its philosophy to share every initiative with its consumers, BSES will strive to show case SCADA to one and all. RWAs, NGOs, budding engineers, school students - all can register for a SCADA Visit by simply registering with:

Your Comments : we value...

"Presentation given by Mr Rizvi of BSES was exhilarating and exhaustive, besides being informative on the entire power scenario in Delhi" - M N Bhattacharya, General Secretary, Federation of Group Housing Societies, I.P. Extension-1

"Excellent demonstration of the technology beneficial for the consumers" - Subhash C Basu, President, Federation of RWA's Mayur Vihar II.

"Really useful system, which is purposeful and for the benefit of residents of Delhi and is extraordinary" - J P Sharma, Secretary, Joint Forum, Vasundhara Enclave Group Housing Societies and Institutions.

Load - shedding schedule...

BYPL has released its 4 months (June - September) load shedding schedule. Prepared in a customer friendly format, the schedule is a 12 page handy booklet. The multi colour, schedule gives greater detail of areas.

The 4 months schedule will largely eliminate the need for the consumers to repeatedly call our 24 x 7 helpline numbers or their local offices.

Although BYPL will endeavor to strictly adhere to the schedule, but load-shedding may increase or decrease, depending upon the availability of power for distribution.

If you haven't received your copy, contact your nearest Division Office.

Tip on Energy Saving

Avoid keeping electronic appliances in the stand by mode since your electricity meter records such consumption.

At your service....Always

No Supply
Billing & Metering
Anti Corruption
