BSES WISHES ALL CUSTOMERS HAPPY DURGA POOJA! HAPPY DUSSEHRA AND SHUBH DEEPAWALI!

Stay clear of electric installations

In the last few years, large scale construction activity is taking place in Delhi. Some of it is unauthorized and being done in a haphazard manner. Many of these dwellings and unauthorized constructions / extensions - built in various colonies have come underneath and dangerously close to BSES' existing overhead Low Voltage (LV), High Voltage (HV) and Extra High Voltage (EHV) lines and electricity installations.

Such constructions and 'extensions' are in complete violation of Rule 58, 60 and 61 of the Central Electricity Authority (CEA) (Measures relating to safety and Electric Supply) Regulations 2010 and related provisions of the Indian Electricity Act 2003 (Section 53 and 68 (5) read with Section 161), which stipulate the minimum horizontal and vertical distance that is essentially required to be maintained between the building / structure and the electricity mains and installations. These rules have been framed for your safety, to avoid any mishap, fatal accidents and power disruptions.

BSES once again appeals to the owners of such unauthorized constructions to remove their illegal and unauthorised constructions from near the electricity mains and installations.

Cash payment @ Easy Bill Counters

You have yet another convenient and secure way of paying your electricity bills. In addition to cheques, now residents of South and West Delhi, can also pay their electricity bills in cash* at select - to begin with 492 - East Bill outlets. You only need to carry your BRPL electricity bill or remember your CA number. That's not all! You will also get an instant receipt upon successful payment of your bill.

The list of Easy Bill outlets is available on the BSES website

*upto Rs 4,000/- as per the prevailing DERC guidelines

'Cool Ideas' continued...

- To conserve energy promote electric vehicles and use Metro services - Akhilesh Kumar Agarwal, Janakpuri
- Person leaving the office/ room last should switch off the lights and any electric gadgets to save electricity - B. Narsi Reddy, Mahipalpur
- We should teach children to save electricity like other good customs - Surya Narayan Jha, Bal Bhawan Public School
- Kindly replace old appliances as they consume 1.5 times

more electricity, than new ones - MD Saifullah Saquib, East of Kailash

- Use energy efficient (5 star rated) products and use solar power - Gautam Verma, Sangam Vihar
- Use solar water heater. It saves 1500 units of electricity per year - Shipa Jain, Saket
- Paint walls of your room in light shades. It will

not only make the room to look bright, but will also save electricity - Manish New, Moti Nagar

- Report Power Theft - Dinesh, Pandit Mohalla, Tuglakhbad Village
- Do not set AC's temperature at minimum and do not keep the refrigerator door open for too long - Madhurshalini, Rajouri Garden
- By using sun control films, AC expenses can be reduced by 5-10 percent - Rahul Prashar, Kartar Nagar
- Refrigerators at home should be switched off for at least few hours every day to conserve energy because compressors always go on stand by mode at certain intervals when it is continuously switched on. Devesh Sharma - Amar Market, Saurabh Vihar, Badarpur
