BYPL joins hands with TERI to improve quality and reliability of power

BYPL and TERI have signed a two-year MoU to conduct cutting-edge research on Demand Side Management, Manual and Auto Demand Response Program, Smart Grid technologies, Solar Rooftop PV, Energy Storage Systems, Electric

Vehicles and Energy Efficiency. It will also develop framework for a 'Green Division' as a model division considering parameters like Net Positive Energy Buildings, Electric Vehicles, Energy Efficiency, DSM and Digitisation.

These studies will help in solving technical issues relating to loading of feeders, static and dynamic voltage regulation, environment issues, power quality and protection that may arise with higher penetration of Solar Rooftop Systems and Electric Vehicle Charging Infrastructure in distribution grids.

The MoU was signed by Mr P.R. Kumar, CEO, BYPL and Mr Girish Sethi, Senior Director, TERI at India Habitat Centre in New Delhi.
