

Stay Cool, Save More: Simple Tips to Cut Your AC Bills!

Air conditioning / cooling load can make up a significant portion, upto 50 percent, of a household or company's yearly energy expenses. By following easy-to-implement tips, you can considerably lower your electricity bill.

- Set your AC thermostat at 24 °C for comfortable and cost-effective cooling.
- Increasing AC temperature by 1 degrees C reduces electricity consumption by 6% - Set your AC thermostat at 24 °C for comfortable and cost-effective cooling.
- Keep air-conditioned room doors closed as much as possible to retain cool air.
- Clean your AC filter every month for efficient functioning.
- Use ceiling fans alongside the AC to circulate air and reduce the AC's workload.
- Line windows and walls with plants and curtains to block sunlight and insulate the room from heat.
- Turn off the AC when leaving the room or house for extended periods to reduce energy consumption
- Cool roofs, like painting them white or installing white tiles, can significantly reduce air conditioning costs.
- Use energy-efficient appliances: When purchasing new appliances, look for those with an Energy Star label. Higher ratings result in higher savings.
