MONSOON SAFETY

ESSENTIAL TIPS TO PREVENT ELECTRICAL MISHAPS

Much to everyone's delight, the monsoons are here again! However, with the arrival of the rainy season, comes a unique set of challenges, particularly those related to water-logging and electrical safety. The chances of electricity-related mishaps and incidents increase significantly during this time. Following simple precautions can help you stay safe and ensure an incident-free monsoon.

- Stay away from all electrical installations such as electricity poles, substations, transformers, and streetlights.
- Caution children not to play near these installations, even if they are barricaded.
- Do not touch electrical appliances with wet hands.
- Keep a tester at home. If a switch or a wall in your house is wet, do not touch it. First, use the tester to check for any electricity leakage. If needed, call your electrician.
- Install Residual Current Circuit Breaker (RCCB) to help avoid shocks and mishaps.

Because safety isn't optional.

Protect what matters most.
Every day. Every moment.

INSTALL RCCB: YOUR FIRST LINE OF DEFENCE

An RCCB detects current leakage and cuts power instantly—preventing electric shock, electrical fires, and avoiding loss.
